Some happy customers . . .

" What an amazing software to use! It's very complete and detailed. "

As a solo Esthetcian, the system helps me to be more organized and show results to my clients very professionally.

Thank you for your amazing service.

Cecilia Galeano
Lumina Skin Center, USA

" I recommend this platform in particular, because it offers so much more than the required thorough intake forms. "

As an Educator for a medical grade skin care line, I will always recommend my training attendees look to a system, most notable the Skin Science Authority Skin Analysis System, as their premier tool when performing consumer skin analysis.

I recommend this platform in particular, because it offers so much more than the required thorough intake forms. It offers an opportunity to really create the best foundation for a well thought out and scientifically backed treatment program. It's like having the access to the knowledge a plastic surgeon or dermatologist can offer at your fingertips.

It is user-friendly, easy to use, and technologically savvy. I haven't seen many systems on the market that offers the same value in terms of content and support.

Candace Noonan, LE COE
Director Of Education
Dermaconcepts USA

" Fernro Skin Analysis System is a wonderful tool for estheticians and skin center owners. "

FSAS gives you a tremendous amount of support through education not only directly to the esthetician but also to share with the client after discussing their skin care needs. Through the health history and skin care questionnaire form, the professional is able to have a full view of the client's concerns before they start the consultation. FSAS offers books on the consultation process as well as ingredients. The best business tool an esthetician or skin center can have on their side.

Cristin Mercer
CEO / Founder
CrisWell Medical Spa

" I am thrilled we have the Skin Analysis System option as I was looking for something credible and professional. "

The Pastiche method, which is complicated and not electronic, was my former method of intake.

I only carry Environ and frequently reference white papers for clients/patients to read from the SAS Library. This is a unique feature of the system that is hard to beat.

Also, SAS is something I can grow with as they will continually add features as needed. Soon I can attach PDF consents to a Customer Record Card. Anything Dr. Fernandes creates is always a step into the future. I think the consultation process separates the best from all the rest and ensures a client for life!

So happy to have the SAS.... I have an MD medical director now. She says the Skin Analysis System is very thorough intake and more.

Shawna Akins
Institute for Advanced Aesthetics
Washington State, United States of America

Just some of the very useful things you can do in the Skin Analysis System.

1 TRAIN | 2 ANALYZE | 3 ORGANIZE | 4 LEARN | 5 CONNECT | 6 FORMS
