COVETEUR

THE BEST SERUMS TO FADE DARK SPOTS

Hyperpigmentation doesn't have to last forever.

By: Hannah Baxter

Focus Care Radiance+ Range by Environ, \$108

This is Joanna Czech's favorite line of products for discoloration. You mix two serums together (packed with artichoke and plum extract, among others), along with a prep lotion, to effectively fade spots and nourish skin. And like the best products out there, you'll feel like a bit of a mad scientist in the process!
