Fight Winter Ice Burn Skin

Bitter cold weather can result in dull, peeling skin and dry rough patches, but what you may not realize is the **long-term damage you encounter** by not protecting your skin! Are you experiencing numbness, itchiness, tingling feeling, pain, blisters, unusually firm or waxy skin? It sounds like you may have an ice burn...

ICE BURN – is an injury that can occur when ice or other cold objects contact and damage the skin. Ice burns can also develop after prolonged exposure to freezing or below-freezing temperatures.

But don't fret! Environ Skin Care has got you covered. Incorporating one or all of the below products daily will help to effectively shield, soothe and improve the look of your ice burn woes.

- **Environ Focus Care Youth+ Tri-Peptide Complex Avance Elixir** (\$136, DermaConcepts.com) acts as **three products in one!** Specially formulated with Měiritage™, a unique blend of Chinese root

LIPPE ■ TAYLOR

extracts, and powerful peptides, the serum helps hydrate the skin and improve the appearance of redness and discoloration that may be associated with an ice burn. As a result, experience softer, brighter-looking skin!

- Ice burns don't stand a chance when it comes to the [Environ Focus Care Moisture+ HA Intensive Hydrating Serum](#) (\$98, *DermaConcepts.com*). Designed with a **concentrated hyaluronic acid formulation**, this serum works to maintain moisture and improve the appearance of dry skin. The skin is left feeling hydrated with a glowing-looking complexion, after only a few days!

- [Environ Intensive Hydrating Oil Capsules](#) (\$90, *DermaConcepts.com*) are enriched with **potent antioxidants, vitamins, proteins and herbal extracts** that, with one single-dose, help soothe weather-stressed skin, leaving it energized and looking velvety soft. Plus, the individually wrapped capsules are perfect for on-the-go when near and far from home!
