Environ's Youth EssentiA Vita-Peptide C-Quence 1

Posted: September 12, 2016

In autumn, just as the leaves change and fall to the ground, our skin goes through its own adjustment for the new season. The sudden brisk of cold brings dry patches, redness and inflammation, making skin seek that special nourishment to help improve its overall appearance.

Environ Youth EssentiA Vita-Peptide C-Quence 1 is the introductory serum to the premium Environ step-up skin care system, which features the series' lowest concentration of vitamins A and C, to improve the effects of moisture levels and brighten the appearance of the skin. C-Quence 1 hydrates the appearance of the skin, softens the look of fine lines and improves the look of sun-damaged skin for a more healthy-looking and radiant complexion. The new Youth EssentiA range offers a full regimen of products that is formulated with high quality peptides, vitamins and antioxidants to help firm and brighten the skin's overall appearance. Seasons may change, but one thing is for sure – beautiful skin lasts a lifetime.

The signature Environ® step-up program is based on varying intensities and levels of ingredients to ensure that the client's skin adapts in a healthy-looking and safe manner. This gradual progression method diminishes chances of retinoid sensitivity effects and other skin reactions. C-Quence 2-4 Serums are the increases of product intensity after skin is acclimated to C-Quence 1.

Environ: Your Perfect Partner

You and your clients can experience the results - driven skin care line that is the secret to beautiful and healthy-looking skin. Environ Skin Care, backed by empirical scientific evidence, incorporates the latest technology in the enhancement of high grade vitamins A, C, E, antioxidants, and peptides to help restore, protect and maintain the appearance of beautiful skin. For over 25 years, Environ has created science based products/treatments with skin friendly forms of vitamins A, C and antioxidants. It maintains its own, dedicated, certified pharmaceutical grade manufacturing facility staffed by over 200 dedicated employees (we make only Environ products in our factory). The new, state-of-the art factory uses proprietary manufacturing systems, clean rooms, gowned production staff, nitrogen blanket, red light, positive pressure air systems and specialized water treatment processing to ensure every product is always at peak performance levels. We are the progenitor and creator of modern skin needling. To learn more, please call 508-539-8900.
