Environ Tips From The Pros - Esthetician, Sandra Velandia

For over 25 years Environ has conducted ongoing scientific research to expand their product offerings for strong, healthy-looking skin. Which is why some of the top experts in the industry recommend the physician skincare brand as a go-to to help provide a healthy-looking, glowing complexion.

New York Esthetician, Sandra Velandia says, "One of the best tips I give my clients is to incorporate Vitamin A and C into their daily routine. Environ Youth EssentiA Vita-Peptide C-Quence Serum 1 and Environ Youth EssentiA Antioxidant Defence Crème are the perfect duo! They work together to normalize the skin, help treat the appearance of hyperpigmentation, sun damage and combat free-radical damage. And with the addition of peptides, the pair helps reduce the appearance of visible signs of aging. This is perfect combo to keep your skin looking young and healthy without the need to use a ton of products!"

Youth EssentiA Vita-Peptide C-Quence 1 (\$112, Dermaconcepts.com) is the introductory serum to the five level collection which features the lowest concentration of Vitamins A (Retinyl Propionate which is a stable form of retinyl) and C to combat the appearance of visible signs of aging. Environ believes that you must "start low and go slow" in order to build up your skin's strength for long lasting results. C-Quence 1 richly hydrates the skin, softens the look of fine lines, and improves the appearance of sun-damaged skin for a more healthy-looking and radiant complexion.

Youth EssentiA Antioxidant Defence Crème (\$102, Dermaconcepts.com) is a lightweight antioxidant rich moisturizer that intensely nourishes the look of the skin for the appearance of a firmer, softer and more hydrated complexion. Targeting premature aging, the powerful formula includes Vitamins C, E and B5, Green Tea, and Rosemary Extract to help protect the skin from the effects of UV damage and external pollution.
